"A key strength of Oyslans is a solid foundation to create and distribute cost effective vertical and micro-vertical solutions and we continue our efforts to innovate and develop solutions to support our fuel retail clients."

Bala-kumaran Tambi-Aiyah
Founder & Director

Oyslans:

- Provides a total integrated solution to convenience & fuel retailers.
- Operates 24/7 to support your needs - ensuring minimal down-time on your site
- Avoids multiple applications and costly interfaces.
- At an affordable price.
- Compatible with SagePay, EchoPay and F75 POSLink payment terminals
- Has established relationship with individual owners of several petrol filling stations and oil companies.
- Easily adaptable to accommodate the growth and changes in your business
- Single retail solution architecture – Includes all critical retail functions needed at store, head office and facilitates proper communication between store and head office.
- Ensures reliability and integrity of systems, reports and facilitates proper reconciliations.
- Improves merchandising decisions
- Generates visuals, tables and reports that can be exported to Excel and Pdf.

Why Oyslans – In-depth knowledge & expertise in fuel retail market

Oyslans is owned by Kazmeraa Ltd and is trading since 2010 with the total annual turnover of 3.2 million GBP and an equity funded global asset base of 3.5 million GBP. It is a UK based complete IT solution and service provider for fuel retailers and convenience stores. Although our price is affordable and competitive, we maintain a healthy ROI due to internal operating efficiency. We believe Oyslans is the **third largest** solution provider in the United Kingdom. Its Founder/Director, Mr. Bala-kumaran Tambi-Aiyah has been in this industry since 1985 and still owns convenience stores and Petrol filling station in the UK. Being an end-user as well as the developer of Oyslans application, he not only knows the problems faced by fellow retailers but also knows how best they should be addressed to improve operating efficiency and bottom line. Business has also expanded operations in the Asian and Australasian countries. We continue to innovate and develop new features to assist its business partners to improve operating efficiency and achieve business success.

We are working efficiently to further reduce the cost of point of sale products.

Forecourt Controller Integration

Oyslans – Touchscreen EPOS has been integrated with forecourt controllers and full control of pump operations – authorize, pause, stop, lock, unlock and for emergency stop/release for all pumps. Oyslans – EPOS supports automatic reading of tank gauge information and deliveries. Automatic readings of pump volumes and pump amounts are supported too. This automation enables fast end-of-shift processing.

Manual Operation Support

Oyslans Forecourt enables data input where it is necessary. Tank dip readings and delivery notes can be entered manually.

Shift Management

The calendar day can be split into one or more shifts. Transactions can then be summarized and processed into statements for each shift. When transactions are ready, end of shift reports can be processed showing differences between sales reported by POS, Tanks and Pumps by volume and amounts.

Wetstock Inventory Management

Oyslans Retail fully supports Purchase Orders and Transfer Orders for wetstock items (grades). Wetstock can be automatically replenished based on sales history or stock levels. Orders can be matched to deliveries at Back Office.

Alerts and Reporting

Errors and alerts from Forecourt devices, POS and Back Office are collected at a single location accessible for further examination by the management through exception reports.

Oyslans Retail has a wide variety of reporting options; by shift, day, month, year, fuel, non-fuel and many more.

Staff Management

Includes a full suite of functions to manage allocations, timetabling and time and attendance capture

A complete solution for Forecourts and Convenience stores.
